

## CLAIMS

1. A resin composition comprising 100 parts by weight of chlorinated polyolefin with a chlorine content of 10 to 50 % by weight, 0.01 to 10 parts by weight of tris(isocyanatephenyl)thiophosphate, and 2 to 40 parts by weight of an organic diisocyanate compound.
2. The resin composition according to claim 1, wherein the chlorine content of the chlorinated polyolefin is in the range of 14 to 40 % by weight.
3. The resin composition according to claim 1, wherein the chlorine content of the chlorinated polyolefin is in the range of 20 to 30 % by weight.
4. The resin composition according to claim 1, wherein the tris(isocyanatephenyl)thiophosphate is contained in an amount of 0.5 to 5 parts by weight per 100 parts by weight of the chlorinated polyolefin.
5. The resin composition according to claim 1, wherein the organic diisocyanate compound is contained in an amount of 3 to 30 parts by weight per 100 parts by weight of the chlorinated polyolefin.
6. The resin composition according to claim 1, wherein the organic diisocyanate compound is 4,4'-diphenylmethane diisocyanate.
7. A paint which contains the resin composition according to claim

1.

8. A resin solution which is obtained by dissolving the resin composition according to claim 1 in a solvent so that the resin composition content thereof is in the range of 10 to 40 % by weight.

9. A urethane-based resin paint which comprises the resin composition according to claim 1 and polyol.

10. An adhesive which contains the resin composition according to claim 1.

11. A printing ink which contains the resin composition according to claim 1.
